PROFILE SUMMARY

Data Analyst with 2 years of professional experience in enterprise CRM analytics, business intelligence, and production database administration and management. Experienced in managing large-volume PostgreSQL databases, developing analytical dashboards, and automating data workflows using SQL, Python, BigQuery, and Looker Studio for BAT Bangladesh and Banglalink. Hands-on experience also extends to data engineering and analytics engineering activities, including ETL, data modeling, data reconciliation, consumer identity resolution, database migration, and comprehensive ECRM database documentation.

TECHNICAL SKILLS

- **Analytics & BI –** Looker Studio, Power BI, Excel, Google Sheets, Power Query, DAX, KPI dashboards, statistics
- **Databases & Cloud –** PostgreSQL, Google BigQuery, SQL Server, MySQL, Oracle 10g, Snowflake
- **Programming & Automation –** SQL, Python, pandas, workflow automation, ETL scripting, data transformation
- **Database Administration & Management –** Production database maintenance, backup/restore, migration, query tuning, partitioning, stored procedures
- **Data & Business Analysis –** Data modeling, reconciliation, consumer profiling, fuzzy matching, segmentation, CRM analytics
- **Version Control & Project Tools –** Git, GitHub, Jira, ClickUp, Trello
- **Technical Documentation & Methods –** Database schema and workflow documentation, SDLC, UML
- **AI Tools –** ChatGPT, Claude; AI-assisted technical research, SQL review and documentation

PROFESSIONAL EXPERIENCE

- **Data Analyst** | Feb 2026 – Present
  V2 Technologies Ltd.
  - Manage and maintain production PostgreSQL databases for BAT ECRM, including data quality, troubleshooting, and support for BigQuery reporting and campaign analytics.
  - Developed multi-method consumer profiling across millions of contact records using SQL, Python, fuzzy matching, consumer attributes, and location data to identify likely distinct consumers and suspicious duplicate patterns.
  - Handled large-volume PostgreSQL database migration using pg_dump, pg_restore, and scripted workflows, with restore checks and data integrity validation.
  - Built batch-based cleanup procedures for historical and partitioned data; handled query optimization, indexing, and database troubleshooting.
  - Reconciled PostgreSQL contact and survey records against BigQuery fact/dimension and datamart tables, investigating discrepancies and backfilling missing survey data.
  - Created comprehensive documentation of the full ECRM database structure, table relationships, data dependencies, and operational workflows; guided three interns and one transitioning teammate.
- **Junior Data Analyst** | Aug 2025 – Feb 2026
  V2 Technologies Ltd.
  - Built a multipage Consumer Segmentation Dashboard with BigQuery SQL and Looker Studio, supporting analysis of consumer groups and improving campaign targeting efficiency by approximately 30%.
  - Created campaign, consumer behavior, and field-performance dashboards with interactive filters, KPI definitions, and reporting datasets.
  - Improved ETL data quality through SQL/Python cleaning, structured transformations, and validation checks; automated recurring workflows, reducing processing time by approximately 20%.
  - Worked with client requirements and operational teams to translate reporting needs into tested datasets and dashboards.
- **Data Analyst Intern** | Feb 2025 – Aug 2025
  V2 Technologies Ltd.
  - Produced more than 15 campaign, call check-back, and live observation reports using SQL for the BAT ECRM project.
  - Built more than five interactive Looker Studio dashboards for campaign monitoring and consumer engagement, following an early BIDA dashboard assignment.
- **Teaching Assistant** | Jan 2022 – Apr 2022
  American International University-Bangladesh
  - Helped 40 students with database concepts and reviewed more than 100 Oracle SQL queries and lab assignments.

EDUCATION

- **B.Sc. in Computer Science and Software Engineering (CSSE)** | 2018–2023
  - American International University-Bangladesh | CGPA: 3.31

ENGLISH LANGUAGE PROFICIENCY

IELTS Academic - Overall Band 6.5 | 23 Oct 2026

CERTIFICATIONS

- Associate Data Analyst in SQL — DataCamp [09 Nov 2024] View Credential
- Associate Data Engineer in SQL — DataCamp [09 Nov 2024] View Credential
- Microsoft Power BI Data Analyst Specialization — Microsoft [11 Jul 2024] View Credential
- Microsoft Excel – Excel from Beginner to Advanced — Udemy [24 Jul 2023] View Credential
- Python Bootcamp From Zero to Hero in Python — Udemy [24 Jan 2023] View Credential
- Business Intelligence w/ Power Query & DAX — Udemy [01 Dec 2022] View Credential
- Software Testing & Quality Assurance — BITM [09 Mar 2022] View Credential

EXTRA CURRICULAR ACTIVITIES

- **Founder Executive Member, MZS Ex-Students Sports Club** | 2020–Present
- **143rd Inter School National Handball Champion** | 2012

ACADEMIC RESEARCH

- **Smart Irrigation System Using IoT** | Final-Year Thesis (2023)

MAJOR PROJECT EXPERIENCES

- **ECRM Consumer Profiling & Identity Resolution** | PostgreSQL | Python | SQL | Client: BAT Bangladesh
  - Developed a consumer identity-matching workflow for millions of CRM contact records, where duplicate entries and inconsistent personal details made unique consumer identification difficult.
  - Combined fuzzy name comparisons, contact attributes, and territory/location matching; used SQL and Python to standardize records and validate likely matches.
  - Helped investigate duplicate and suspicious identity patterns, improve the reliability of consumer counts, and identify intended consumers for campaign follow-up.
- **ECRM Single-View Campaign & Consumer Analytics** | BigQuery | Looker Studio | SQL | Client: BAT Bangladesh
  - Built a consolidated analytics dashboard for campaign reach, consumer contacts, consumer counts, Retail Agent activity, and retailer coverage, with year- and region-wise trends.
  - Added drill-down tables and filters for campaigns, location hierarchy, primary/secondary brands, age groups, gender, and profession to support operational analysis.
- **ECRM Consumer Segmentation & Lifecycle Analytics** | BigQuery | Looker Studio | SQL | Client: BAT Bangladesh
  - Developed brand-family segmentation with Solus, Vulnerable, and Dualist consumer classifications, comparing primary/secondary brands, price tiers, and competing brands.
  - Enabled analysis by region, area, house, territory, and point through interactive classification and brand-level breakdowns for targeted campaign planning.
  - Separately built a consumer lifecycle view tracking campaign stages, coupon communication, and average time between stages for operational follow-up.
- **ECRM Consumer Behavior & Brand Movement** | BigQuery | Looker Studio | SQL | Client: BAT Bangladesh
  - Analyzed consumer footfall across regions, areas, territories, and points, alongside unique-versus-repeat interactions grouped by contact frequency.
  - Tracked brand movement through current, new, and unchanged consumers, with brand-level inflow/outflow comparisons using previous and current brand data.
- **RA Performance & Compliance Monitoring** | BigQuery | Looker Studio | PostgreSQL | Client: BAT Bangladesh
  - Built separate Retail Agent and contact compliance views, classifying activity as green, amber, or red using campaign-specific call-duration rules.
  - Included average call duration and interval, hourly contact trends, location-based activity maps, and RA-level detail tables for supervisor review.
- **ECRM Database Administration, Migration & Reconciliation** | PostgreSQL | BigQuery | FDW | dblink | Client: BAT Bangladesh
  - Managed PostgreSQL data operations during a large-volume database migration using pg_dump and pg_restore, with checks on data integrity and database compatibility.
  - Handled historical-data retention, partition maintenance, batch-cleanup procedures, and database performance investigations.
  - Reconciled source contact and survey data with BigQuery warehouse/reporting tables; investigated mismatches and backfilled missing survey records.
- **RYZE AI Product & Token Analytics** | PostgreSQL | Looker Studio | SQL | Client: Banglalink
  - Built two interactive dashboards covering AI token purchases, allocation, disbursement, consumption, free credits, and campaign performance.
  - Developed a token disbursement automation script and custom reports to reduce repeated manual processing; supported database migration and management.
  - Tracked AI feature requests and token usage with user-level views to make digital-platform activity easier to monitor.
- **Maven Pizza Sales Report** | Personal project | Power BI | SQL Server | View Report | GitHub
  - Analyzed 50,000+ sales records to identify demand patterns, peak hours, and operational bottlenecks.
  - Built a Power BI report with 15+ KPIs using SQL-based ETL, data modeling, and DAX measures for sales and performance analysis.
  - Addressed five business questions on inventory and operations; recommended seven improvements with a projected 3% revenue increase.
- **Car Transport Management System** | Academic project | Oracle 10g | SQL | View Project | GitHub
  - Led a four-person academic team to develop an Oracle 10g database for a car transport management system.
  - Designed the ER diagram and normalized schema, and implemented 100+ DDL/DML statements, including window-function queries.
  - Documented the database design, table relationships, and development process to support data integrity and maintainability.
- **Spotify Most Streamed Tracks** | Personal project | Power BI | View Dashboard | GitHub
  - Participated in the October 2023 DataDNA challenge using Spotify most-streamed track data.
  - Developed a Power BI dashboard comparing track popularity and streaming trends across different years.
